

School District of Mondovi

Mondovi, Wisconsin

The School District of Mondovi was seeking a design firm to provide architecture and engineering services for their 2018 referendum projects, which were expected to cost between \$10 million and \$30 million. After interviewing Hoffman, the District decided to hire Hoffman to provide both design and construction services. The District found value in Hoffman's integrated process which would allow the community and District to avoid needless fees and offer the greatest opportunity to meet the desired schedule.

Following a successful November 2018 referendum, Hoffman provided design services and is now managing the construction. Highlights of the \$18 million renovation and expansion project include safety and security improvements, enhancement of the District's 21st century learning program and STEAM rooms, mechanical upgrades, expansion of the tech ed space, and relocating and remodeling offices and art departments. Improvements will also touch the school's bus drop-off area, playgrounds, and multi-purpose room.

Scope

Addition, Renovations

Area

Additions: 10,000 sq. ft.
Renovations: 30,000 sq. ft.
