

ST. THOMAS MORE PARISH

APPLETON, WISCONSIN

.....
"I HAVE BEEN VERY PLEASED WORKING WITH HOFFMAN. THE PROJECT GOT DONE ON TIME AND UNDER CONSTRUCTION BUDGET. ALL PERSONNEL WERE VERY PROFESSIONAL AND PLEASANT TO WORK WITH." – Father Jim Lucas

St. Thomas More Parish selected Hoffman to handle various worship space enhancements and renovations to their church in preparation for their 50th anniversary. The interior remodeling and addition were deemed necessary to accommodate liturgical and spiritual diocesan directives as well as resolve the practical needs of a modern congregation and the physical needs of a 25-year-old facility.

The 13,000 square foot project featured numerous improvements, including upgraded finishes throughout the facility; the reconstruction of the Sanctuary; the realignment of pews

to accommodate kneelers; acoustical and audio-visual system upgrades; installation of a new, fully controllable lighting system; HVAC system replacement; security and accessibility enhancements; and the addition of new bathrooms to serve the school cafeteria and parish space.

Sustainable features of the project included the use of LED fixtures and low-VOC materials and the installation of low-flow, sensor-controlled plumbing fixtures.

Prior to the renovation, Hoffman provide the parish with numerous

pre-design services, including the development of a conceptual plan and construction budget, helping build congregational support and funding, and obtaining diocesan approval.

SCOPE: Renovation

AREA: 12,964 sq. ft.
